Art Unit: 1761

It is noted that upon further review, the restriction requirement as to plant biomass is withdrawn.

Applicant's election without traverse of coffee as the single disclosed species in papers filed January 8, 2004 is acknowledged. Claims 1-29 will be examined.

Claims 8-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 16 and 17 are allowed.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 14, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lamaison et al (Fitoterapia reference) in view of Christ et al (US Patent No. 4,354,035).

Lamaison disclose the isolation of rosmarinic acid from a plant biomass of the Labiatae family using a hydroalcoholic extract (see entire document).

The claims differ as to the specific extraction steps.

Christ et al disclose the extraction of rosmarinic acid from plants comprising extraction with water, adjustment to pH of 2 to 2.5, and extraction with an organic solvent (see entire patent).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use the specific extraction steps of Christ et al in that of Lamaison et al because the extraction of rosmarinic acid by a hydroalcoholic extract is conventional in the art.

Claims 18-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Christ et al (US Patent No. 4,354,035) or Lamaison et al (Fitoterapia reference).

Christ et al disclose the extraction of rosmarinic acid from plants (see entire patent).

Lamaison disclose the isolation of rosmarinic acid (see entire document).

Claims 26-29 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 62269642.

JP 62269642 teaches the addition of a rosemary extract to coffee (see English abstract).

Art Unit: 1761

Applicant claims specific concentration and absorbance values. These limitations are seen as no more than inherent and/or obvious to that of JP 62269642 because the same components are used.
